

# Virtual Reality Pain Management Clinical Trial

**Safe, Non-pharmacological, Effective**

Karuna uses virtual reality mirror therapy and graded motor imagery to help people with chronic limb pain. People who have had success with the program have been patients with CRPS, Fibromyalgia, Phantom limb pain, Multiple Sclerosis, Stroke, Post-surgery and other types of chronic pain.

Why start virtual embodiment training?

- **Effective**
- **Safe**
- **Scientifically Proven**
